

# THE TITLE SAYS IT ALL: Children the Heart of the Matter

Adele Diamond's keynote at this upcoming conference in Surrey, one of Canada's fastest growing and youngest communities, highlights how we can make the biggest difference for our kids and their futures. Brain development research informs us on the variables that promote self-regulation and other attributes to support children's development and capacity to thrive. Everything we know today, as human service providers and parents, should influence how we lead, guide and support the next generation from infancy through childhood.

Child Development and the Brain:  
What Every Child Needs to Succeed

Dr. Diamond will explain why the most effective way to improve academic achievement is probably not to focus narrowly on academic instruction alone, but to address children's social, emotional, and physical needs as well. Come and learn what brain science says about how to help your child thrive.

Friday, Jan. 15, 2016

7:30 to 9:30 p.m.

Doors Open at 6:30 p.m.

Bell Performing Arts Centre  
6250 144 Street  
Surrey, BC
